SPONSORSHIP & EXHIBITION OPTIONS

SMART GRID FORUMS | SGT27

Smart Grid Technical Forum

16-18 March 2027 | Geneva, Switzerland

EARLY BIRD

Save 10%
by booking & paying before
30th September 2026

Event Highlights Include:

- 1-Day Strategic Plenary Sessions
- 2-Day Technical Conference
- 3-Day Exhibition, Live Demo Labs, Technical Workshops
- Utility Innovation Excellence Awards Ceremony
- Rountable Discussion Session
- Communication Training
- Post-Event Monthly Online Meetups

Technical Conference Tracks Include:

- Substation Virtulization
- SCADA & Control Rooms
- Smart Metering
- Grid Connectivity
- OT Cybersecurity
- DER Integration
- Big Data Analytics
- IEC 61850 Implementation

EVENT OVERVIEW

Event Objectives

The 8th annual SGT27 draws together approximately 500 smart grid technical professionals from across the European power sector, with an equal balance of power utilities and technology suppliers in attendance.

The objective of this event is to fast-track grid modernization projects by amplifying the utility voice and placing utility product needs centre stage. A series of utility senior management panel discussions on day one sets the scene for infrastructure investment priorities in the next 2-3 years.

The 8-track technical conference that follows provides insights into the successes, setbacks and future roadmaps of utility project leaders across the eight most investment intensive power system domains. The conference agenda is complemented by a lively networking programme including an awards ceremony, roundtable discussion sessions, and post-event monthly online meetups.

New for 2027

The move to Geneva will attract utility representatives from Switzerland and surrounding countries in higher numbers, and provide a geopolitically neutral setting for international attendance, shifting the audience profile and enabling sponsors to open brand new doors.

The expansion of the technical conference from 6 to 8 tracks ensures organic growth of utility participation, enabling sponsors to meet a more diverse range of utility representatives under one roof at one time. The greater number of conference linked sponsor packages provide many more sponsors with the opportunity to position as thought-leaders.

Why Sponsor SGT27?

- **Brand Awareness** – position your organization as a trusted brand in the European power sector
- **Expertise Sharing** – demonstrate your thought leadership and technical expertise by sharing insights into your product performance in the field
- **Lead Generation** – meet with a highly focused group of utility product specifiers and procurement influencers
- **Targeted Promotion** - take control of who you communicate with and how, through the curated audience options for the live demo and workshop packages
- **Intelligence Gathering** – hear directly from utility project leaders on the successes, setbacks and future roadmaps of their digital grid projects
- **Align with Excellence** – enjoy the Innovation Excellence Awards Ceremony and position your organization as partners to excellence

EXHIBITION STAND STYLE

Booth Inclusions:

- Shell scheme booth (3m wide x 2m deep x 2.5m high)
- Carpet Electricity power point
- WiFi access
- Catering during exhibition hours

Exhibitor Brings or Rents:

- Furniture
- Brochure stands
- Banners
- Screens & laptops

LIVE DEMO ROOM

Room Inclusions

- Boardroom table
- 6 x chairs
- Screen with HDMI connection
- In-room refreshments

WORKSHOP ROOM

Room Inclusions

- Roundtable setup for 30-50
- Screen with HDMI connection
- Working lunch

VENUE

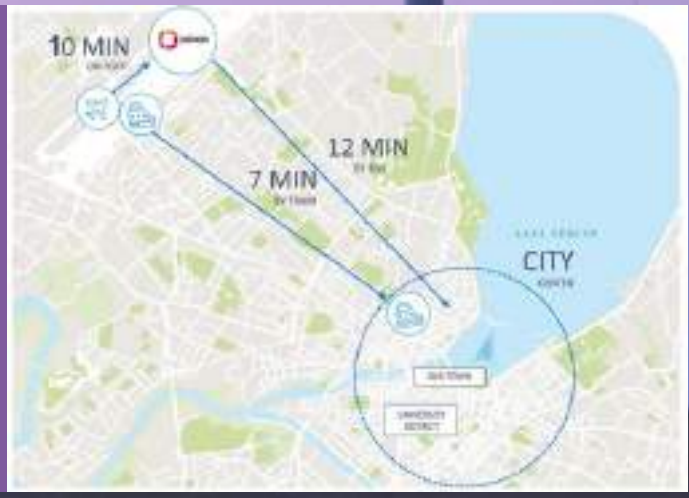

Palexpo Geneva

Rte François-Peyrot 30,
1218 Le Grand-Saconnex, Switzerland

Easy access by car, taxi, coach and bicycles

- 3,000 covered parking spaces on-site
- Direct exit to the venue from the motorway
- Taxi rank available in front of the Congress Centre
- Large drop-off area for 30 coaches
- Four fast charging stations for electrical cars (20kW) available on site
- Bicycle parking facilities

10 RULES FOR EXHIBITOR SUCCESS

1. **BRAND IDENTITY:** Fully brand and furnish your booth for maximum impact.
2. **REPRESENTATION:** Nominate a balance of technical, sales and senior colleagues.
3. **CUSTOMER INSIGHTS:** Ensure your onsite team participate in conference sessions.
4. **PLANNING:** Pre-schedule meetings via the event app 2 weeks before.
5. **PERSISTENCE:** Go where the prospects go; conference sessions, networking sessions, awards, roundtables, post-event meetups.
6. **CREDIBILITY:** Submit a customer case-study for the conference agenda.
7. **ECOSYSTEM:** Recommend your ecosystem partners to exhibit alongside you.
8. **EXCELLENCE:** Nominate a customer projects for the Utility Awards Ceremony.
9. **BADGE SCAN:** Request permission to scan prospect badges for post-event follow-up.
10. **ASSISTANCE:** Feedback your experience to us and request support as and when required (not only at the end of the event).

SGT26 PARIS

2026 PARTICIPANT TESTIMONIALS

"SGT26 was a wonderful experience. The AI sessions focused on Large Language Models were particularly insightful and gave me lots of new ideas for when we update our digital strategy. Overall, a great place to update on what's happening in the smart gids as a whole."

Mihkel Harm, CEO - **Elektrilevi**

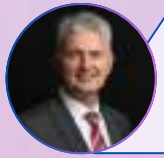

"This was my first SGT and I loved it. We have a lot of ongoing projects in OT Security and the information I gained here will help us make it harder for attackers to reach our environment. This is a must-attend conference if you are in the power industry."

Andrea Szeiler, Group CISO - **MVM**

""SGT26 exceeded my expectations. Great to see how solutions that were referenced as success stories in utility presentations were actually part of the 1:1 demos and exhibition. This is what I call a complete one stop opportunity to network with purpose."

Rakesh Bali, OT & Cyber Security Architect - **National Grid Electricity Transmission**

"At SGT26 I got a lot of information, a lot of new contacts, had a lot of good conversations, and got a lot of great ideas. I'm a Risk Manager, most of the people attending this conference have a very technical background. This is the place I get to learn a lot about technical stuff. In risk management you need to understand if what's written in terms of risk and measures is realistic."

Razvan Tudor, Director of Risk Management & KYC **- Electrica**

"A great event to meet other grid operators from across Europe, learn what challenges they are facing, what innovations they're working on, and also from vendors what new solutions they're bringing to the market. Very valuable to not re-invent the wheel over and over, SGT saves you time and money."

Jonas van den Bogaard, Digital Strategy Lead **- Alliander**

"This conference helped me meet many leading experts in the industry who truly broadened my perspective and inspired me to reconsider my future plans. Until the next SGT, this will likely remain the best conference I have attended."

Ismail Hakan Daghan, Chief Engineer, Metering Systems Group **– TEIAS**

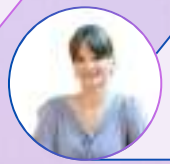

"We from SVK always have a big delegation, because there are too many interesting topics and points of view to listen to, and we don't want to miss out."

Giuseppe Martinelli, Business Architect **- Svenska kraftnät**

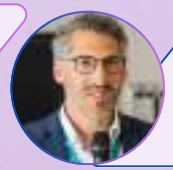

"What makes SGT so valuable is that it brings together communities that don't always interact enough in day-to-day operations. What is particularly important is the exchange of practical experience, not just theory, but what actually works in substations, control centres, and distributed environments. These conversations move the industry from isolated efforts to more coordinated and resilient approaches."

Antoine D'Haussy, RVP OT Practice Lead International **- Fortinet**

"This year we participated in SGT for the first time. The quality of the participants was extremely high. We made a lot of new connections, exchanged experiences and learned a lot. Great job! We look forward to participating again."

Milica Kovacevic, Digital Grid Events Marketing Manager **- Schneider Electric**

"Thanks for the quality of the overall event, especially the quality of the presentations that stay technical and go into deep details with limited commercial speech."

Bruno Castagné, Senior Application Engineer **- GE Vernova**

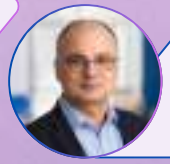

"What an amazing week in Paris. Early mornings, full days of discussions, late evenings... repeated for three intense days. Exhausting? Yes. Worth it? Absolutely. The technical case-studies were incredibly insightful. The Q&A sessions and follow up conversations pushed me to rethink how solution providers can deliver even more value. I am grateful for the learning, inspired by the conversations, and already looking forward to the next SGTech!"

Mariana Mascarenhas, Principal Solution Consultant **- Aspen Technology**

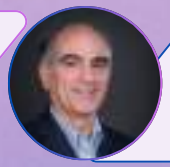

"A great format for anyone interested in the Smart Grid. A great all-round event for both technology suppliers and utilities to attend. I am looking forward to SGT27 already, it's a really open, friendly environment.

Neil Bosworth, Director of Product Marketing, Smart Energy **- Wirepas**

"Best Smart Grid Industrial Conference. A very nice atmosphere, not too big and not too small. High concentration of utilities for many discussions about the smart grid."

Andrea Bonetti, Senior Specialist Protection Relays and IEC 61850 **- Megger**

"A great opportunity to meet up with customers, suppliers and partners to discuss business opportunities, new technologies and current events in the Energy market."

Tony Milne, Business Development Manager **- Advantech Europe**
